

Detecting and Managing Colorectal Cancer

- the role of molecular markers

Foto: Per Marius Didriksen

Thursday 5. September 2013, New Research Building, Radium Hospital

Auditorium

11:30 - 11:40	Opening
11:40 - 12:05	Population genetic markers of colorectal cancer risk <i>Ian Tomlinson, Oxford, UK</i>
12:05 - 12:30	Bowel cancer screening – the UK experience <i>Marco Novelli, University College London, UK</i>
12:30 - 12:55	Management of early colorectal cancer; marker driven adjuvant therapy <i>David Kerr, Oxford, UK</i>
12:55 - 13:15	Coffee break
13:15 - 13:40	Familial colorectal cancer <i>Marco Novelli, University College London, UK</i>
13:40 - 14:05	MSI and other prognostic markers for CRC <i>Stanley Hamilton, MD Anderson Cancer Center, Houston, USA</i>
14:05 - 14:30	DNA image cytometry in colorectal cancer <i>Håvard Danielsen, Oslo University Hospital</i>
14:30 - 14:45	Coffee break
14:45 - 15:10	Surgery, and clinicopathological variables: the prognostic impact and potential bias for studies of molecular markers <i>Arild Nesbakken, Oslo University Hospital</i>
15:10 - 15:35	Translational relevance of biomarkers for early detection and prognosis <i>Ragnhild Lothe, Oslo University Hospital</i>
15:35 - 16:00	Radiotherapy for Rectal Cancer: Current status and use of predictive markers <i>Kjell Magne Tveit, Oslo University Hospital</i>
16:00 - 16:25	Is there a role for tumour vaccines in management of CRC? <i>John Marshall, Georgetown, Washington DC, USA</i>
16:25	Closing remarks
